

NOTES

- 1. Boundary & Topographic information is based on a field survey performed by Stephen A. Higgins of Ritter & Plante Associates, LLC during April 2011.
- 2. Benchmark is an existing sanitary sewer manhole at the intersection of Ashbourne & Oak Lane Roads, invert elevation is 198.83 (SE), Vertical datum is based on Cheltenham Township Sewer Datum.
- 3. FEMA FIRM Map #42091C0415 E effective December 19, 1996 designates the site as Zone X, areas outside the 500 yr. floodplain.
- 4. Some of site improvements such as buildings, curbing, and parking have been taken from aerial photographs, other plans and from public GIS sources.
- 5. No freshwater wetlands exist on the property as per the Wetlands Evaluation Report as prepared by Envirosearch Consultants, Inc. dated May 13, 2011.
- 6. Only above ground visible improvements have been located; underground utilities and invert elevations shown have been taken from Township Records and are not survey measured or located. The location of the underground utilities are approximate and must be field verified by contractor before commencement of any construction.
- 7. The property is zoned R4 Residence District with the Age-Restricted Overlay District by Special Exception.

* If building height exceeds 45 feet, each setback increases by 3 feet for every foot of additional height beyond the 45 feet. Total height is 47, therefore, 0' was added to each setback.
** For every story in excess of 3 stories, the allowable building coverage is reduced by 2% and the allowable impervious coverage is reduced by 3%.
*** 15 of the total 155 parking spaces are ADA accessible.

List of Variances & Waivers

- 1. Section 295-165 B (2): Steep Slope Conservation District Boundary definitions - exceptions: The Township Engineer may exempt man-made slopes from the provisions of this article if the alteration, regrading, clearing or construction upon such slope can be accomplished without causing erosion of the slope and will not result in soil failure, etc.
- Relief: The steep slope areas on the site consist of a manmade band wrapping around from the greenhouse structures to the existing residence and appear to have been created when the existing house was built. The area of steep slope is approximately 0.67 acres. The majority of the steep slopes are contained to the interior of the property. All of the slopes will be disturbed. All soil and erosion control measures will be taken to control erosion and runoff until after the site is stabilized.
